

Litepaper v1.1

Mero LitePaper

Overview

- **Mero is a token built on the (BSC) Binance Smart Chain with a goal to spear-head open source development towards commerce adoption of BSC cryptocurrencies.**
- **In a time when there is an abundance of crypto currency projects offering goals to problems with blockchain functions. We are looking out beyond the crypto-sphere to foster real-life engagement of Cryptocurrencies.**
- **We are solving the problem of the lack of Crypto use in the real world by developing tools that will enable merchants to simply and easily use BSC chain tokens in real-life applications, including MERO.**

Goals

- Provide simple to use free open source tools for merchants to accept BSC chain token payments.
- Educate and equip crypto users and general public on using Crypto for payment options.
- Foster a trust in crypto tokens as a means of money and a storage mechanism of value.
- Create fast, simple wallets for MERO that simplify the process of using crypto in real-life use.
- Help encourage adoption of BSC chain with open source development that will be free to other projects.

Technical Overview

- **Current Crypto Payment Gateways** centralize processing in various mechanism that increases complexities and thus increasing the cost for vendors.

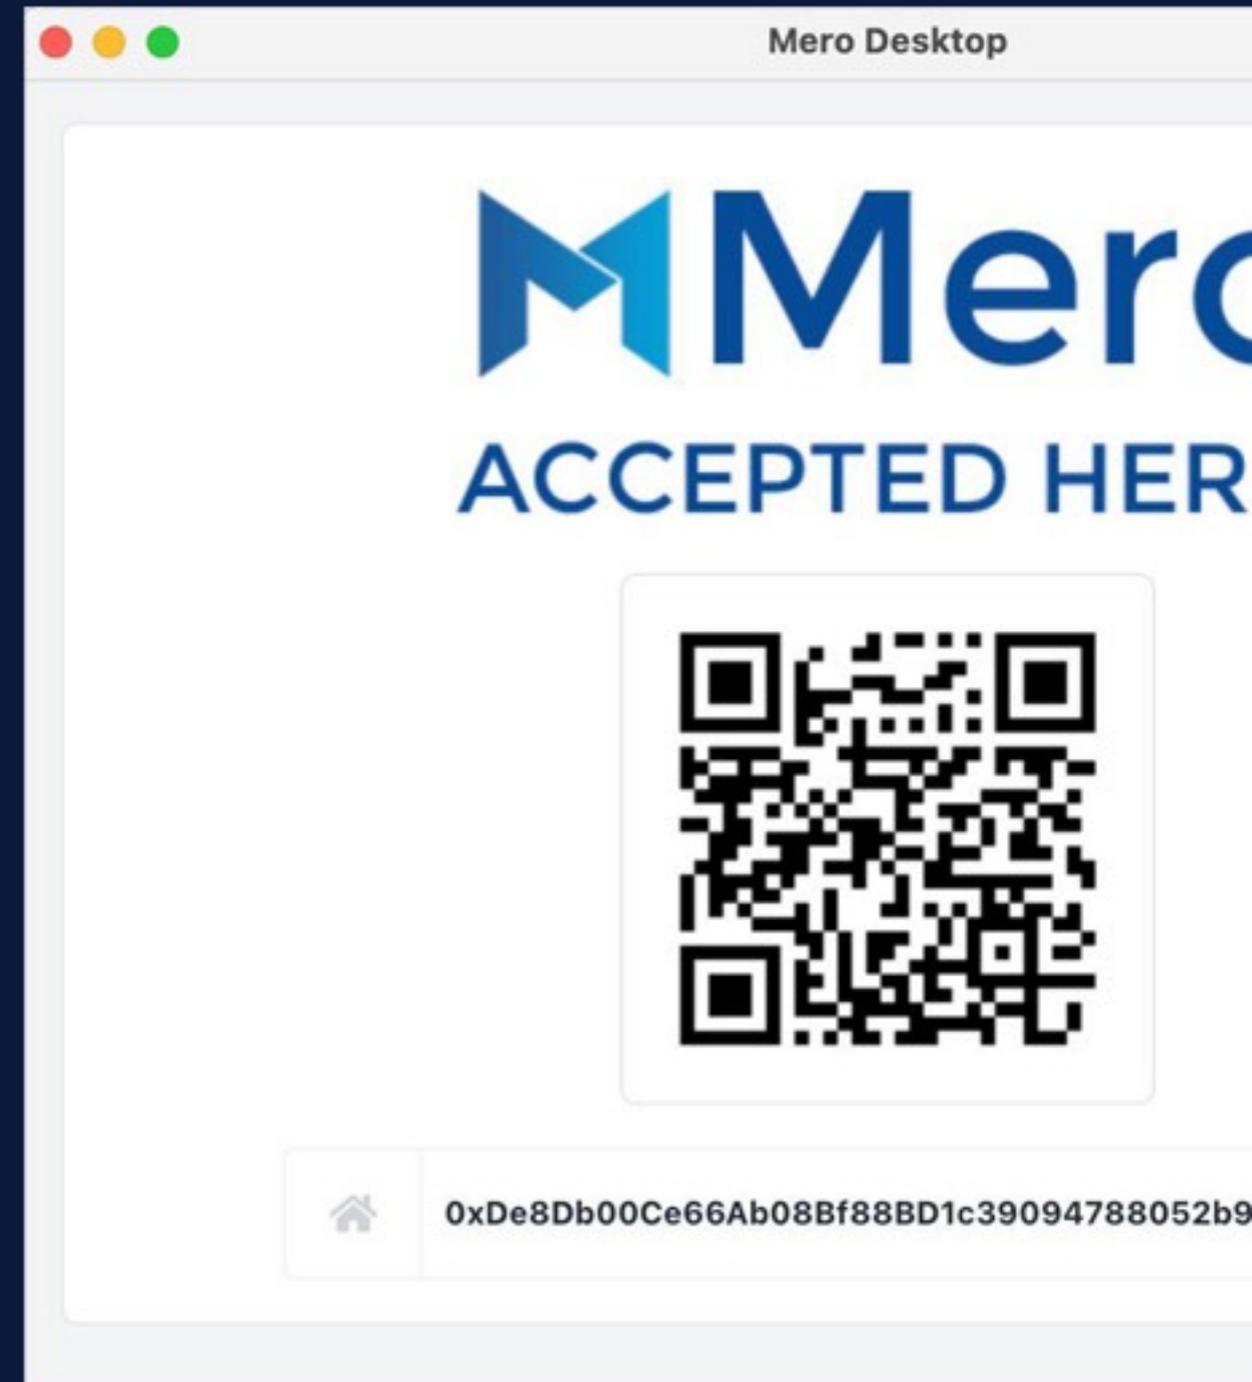

- **Decentralized trustless merchant solutions** are not readily available especially on the **Binance Smart Chain** currently. Trustless transactions means the seed code, or wallet keys are in the possession of the end user and vendor. Thus they transaction via the **BSC** blockchain directly with each other with no intermediary party.

- **Mero** takes the approach of a decentralized trustless approach. We never retain any records of transactions, no IP records, etc. This gives privacy to vendors and those transacting with the merchant.

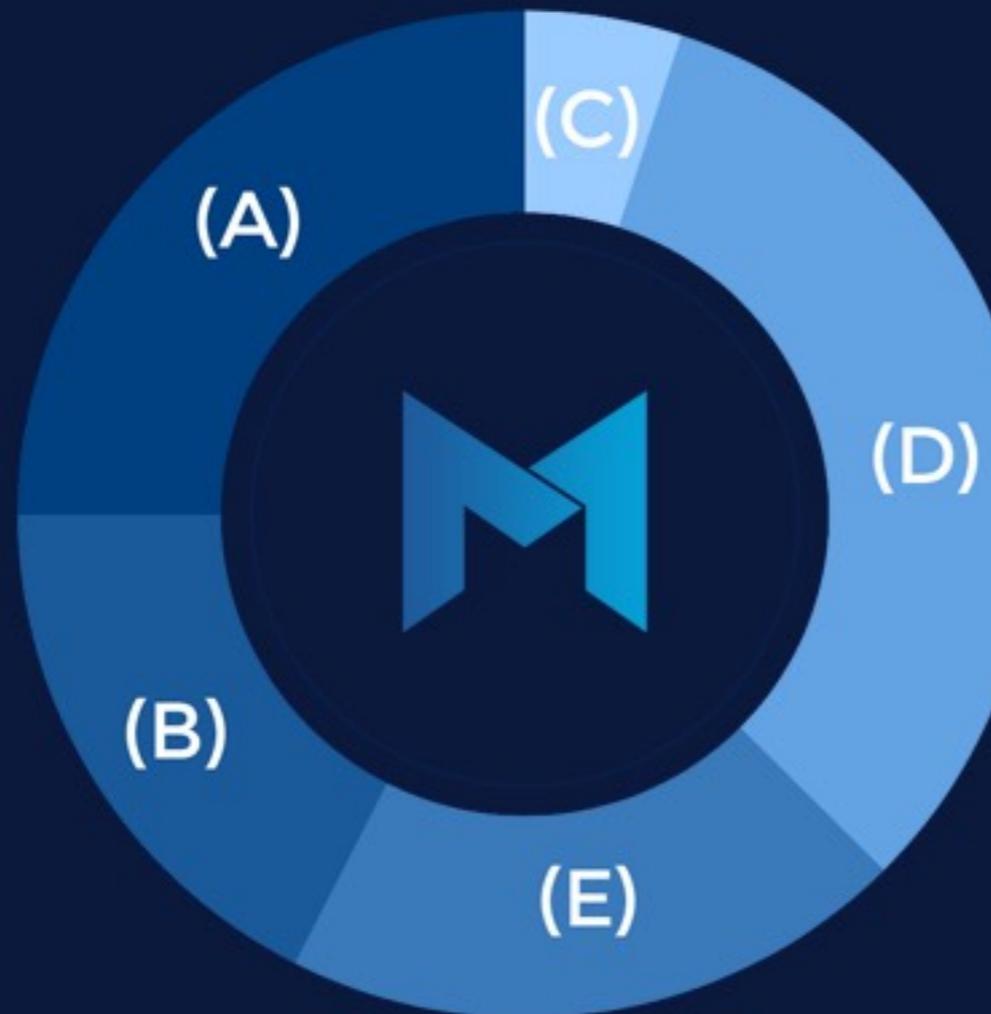

Our Solution

- Mero is offering secure and extremely simple to use based on VueJS scripting which makes the wallets very light-weight. These wallets will be the way an end user initiates a transaction with the merchant. And how the vendor guarantees a payment has been processed and received.
- A QR generator within our desktop wallet app is being developed that will enable a merchant to create a printable poster with Mero branding and QR code to put up in their shop or restaurant, etc.
- Upon creation of the QR generated poster it is linked to the receiving wallet address. This link creates a bond between the QR code and the wallet address, so any funds sent to the post appear in the wallet.

Token Ecosystem

**(A) - IFO (Initial Farm Offering) \$250M
\$MERO / 25%**

**(B) - Treasury (Development) 175M
\$MERO / 17.5%**

(C) - Team Funds 50M \$MERO / 5%

**(D) - Community Airdrops 325M \$MERO /
32.5%**

(E) - Initial Liquidity 200M \$MERO / 20%

- Community airdrops compose of various slow distribution models that will increase an active user-base of MERO and bring recognition to the project.

- Initial Liquidity will be disperse over a several month period over several swap platforms.

- The treasury will be accessed for future development and is essentially locked.

Roadmap

Q1 2021

CoinGecko Listing

Coinmarketcap Listing

BscScan Image and Info Update

Listing to Additional Swaps

Deployment of Desktop APP

Deployment of QR Generator

Q2 2021

Mero IFO Pre-Sale Event

ETH Cross-Chain Deployment

Mero Android Mobile Wallet

Ecommerce Partnership

Integration Videos of Merchants

Listing to 2-3 Other BSC Swap

Listing to Medium Exchange

Q3 2021

TRON Cross-chain Deployment

Yield-farming and staking Deployment

Mero IOS Mobile Wallet

Listing to Medium Exchange

Conclusion

- **Within a crowded sector of new assets being added to different chains, we believe MERO will stand out with its excellent branding and vision for real-life application.**

We believe once people see real-life adoption videos and photos of MERO in action this will be a game-changer and will prove a way forward for the BSC chain to be applied into real life scenarios.

Remember: Mero is Your Money 2.0

The logo features a stylized blue 'M' icon to the left of the text 'Mero is Your Money 2.0'. 'Mero' is in blue, 'is Your' is in white, and 'Money 2.0' is in white. The background is a dark blue gradient.

**Mero is Your
Money 2.0**
